COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Mail Stop Issue Fee
Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

The Examiner indicates:

[The present invention is directed to an apparatus for assisting in compressing video data in a computer system including a central processing unit and a system memory. Each independent claim identifies the uniquely distinct features: "a result buffer coupled to the operation unit, the result buffer further including a memory interface configured to couple with the system memory via a first bus independent of a second bus configured for coupling with the central processing unit via a north bridge chip, the result buffer for temporarily buffering the difference frame prior to storing the difference frame in the system memory, the apparatus configured to operate within the north bridge chip of the computer"]

system to enable the central processing unit to retrieve the difference frame exclusive of the second bus and directly from the system memory via the north bridge chip for further compression of the video data by the central processing unit. All the references of record, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.]

Applicants concur with the reasons as stated by the Examiner insofar as they comprise a summary, and are exemplary and not limiting. However, the independent claims as allowed include other and different language than that specified by the Examiner, and the allowed dependent claims include other and further features and elements. Accordingly, the scope of the claims must be determined from the literal language of each as a whole, as well as equivalents thereof.

Respectfully submitted,

Kevin K. Johanson
